HOW WE QUOTE FOR A SOLAR INSTALL

Our approach to quoting solar projects is thorough and tailored to each customer's unique needs.

Our Five Stage Quoting process:

1

Initial Consultation

An in depth initial consultation where we discuss your energy needs, vision and budget.

2

Design

Our advanced software creates a tailored solar system design for your property.

3

Proposal

We provide a comprehensive proposal with design and cost breakdown.

SOLAR QUOTING

4

Property Detailed Survey: Once you are satisfied with the proposal, our surveyor conducts a detailed property survey. This step is crucial to ensure the accuracy of our software generated measurements.

5

Final Confirmation: With our system software, design and surveyor measurements in alignment, we reach the final confirmation stage. At this point, we set an agreed start date and finalise the contract.

Investing in Solar PV is a significant decision, and we are dedicated to making this process transparent, efficient, and tailored to your unique requirements

If you are interested in solar energy give our office a call, our knowledgeable installers are here to answer any questions you may have.
